BAD WATER

Is the Cause of An Epidemic of Typhoid Fever at West Union.

A number of residents of West Union have contracted typhoid fever through the use of an infected municipal water supply, according to Mayo Tolman, sanitary engineer of the state health commission.

The well from which a number of families get their water, Mr. Tolman said, contains typhoid germs. A previous epidemic of typhoid was traced to impurities in the water of Middle Island creek, the principal source of the town's water supply. He recommended that lime be used in the water to destroy the germs, but found on his return that the people had abandoned its use.

The sanitary engineer has warned the people that they will either have to use the preventive or find another water supply.

Mr. Tolman has also conducted an investigation into sanitary conditions at Saborton, a manufacturing suburb of Morgantown. This investigation was made at the instance of Judge George C. Sturgis of Morgantown.

A UNIVERSAL FOOD.

Following Nature's Footsteps.

"I have a boy two years old, weighing forty pounds and in perfect health who has been raised on Grape-Nuts and milk."

"This is an ideal food and evidently furnishes the elements necessary for a baby as well as for adults. We have used Grape-Nuts in large quantities and greatly to our advantage."

One advantage about Grape-Nuts food is that it is partially pre-digested in the process of manufacture. The starch contained in the wheat and barley is transformed into a form of sugar by the same method as this process is carried out in the human body; that is, by the use of moisture and long exposure to moderate warmth, which grows the distaste in the grains, and with long baking makes the remarkable change from starch to sugar.

Therefore, the most delicate stomach can handle Grape-Nuts and the food is quickly absorbed into the blood and tissue, certain parts of it going directly to building and nourishing body and brain. "There's a Reason."

CARRANZA IS DEFYING YOUR "UNCLE SAM"

Sends Message of Displeasure to Secretary Lansing and Southern Republics.

ATTEMPT TO PERSUADE

Latin-American Republics Not to Join United States in Peace Effort.

(BY ASSOCIATED PRESS)
WASHINGTON, Aug. 12.—General Carranza through his Washington agents today notified Secretary Lansing that "the Mexican people view with displeasure" any attempts tending to frustrate success of Carranza's armed forces. Carranza's message referred to the Pan-American conference and was taken as plainly signifying he would not agree with its action toward Mexican affairs.

Carranza also has sent a similar notification to the diplomatic representatives of all the Latin-American republics participating in the Mexican conference saying that any attempt between them and the American government to solve the internal situation of Mexico "would involve an act which could not be looked upon with levity as it would mean on the part of the Latin-American nations the acceptance of the precedent that they can take part in any internal affairs of a sister nation with the cooperation of the United States, something absolutely undesirable, not only insofar as it may affect the relations between the Latin-American nations themselves but also because it might involve the moral support of any future decisions which grow out of similar conferences."

Carranza's communication delivered on his behalf by his Washington agent, Eleazar Arrondo, was regarded as little less than a defiance of the United States in its efforts to bring all the Mexican factions into a conference for peaceful settlement of Mexican affairs.
